INDEX TO VOLUME XXI

The asterisk* preceding the page number indicates an original article in this Journal. The letter T preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter D preceding the page number indicates a discussion of an original article or some other item published in this Journal. The letter B preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

Acid phosphatase in the nervous system. I. evaluation of the hexazonium pararosanilin method. II. the histochemical localization with hexazonium pararosanilin, *263
Activity of succinic dehydrogenase in glial tumors, *137
Adams, R. D., see Waksman, B. H., *25, *491
Adrian, E. K., Jr. and B. E. Walker, incorporation of thymidine-H^3 by cells in normal and injured mouse spinal cord, *597
Alcohol injections in cats brain, experimental lesions, *294
Allen, N., D321
Alpers, B. J., see Berry, R. G., T325
Alvord, E. C., Jr. and P. M. Marcuse, intracranial cerebellar meningo-encephalocele causing hydrocephalus by compression at the incisura tentorii, *50, D313, T329
Alzheimer's disease, clinicopathologic significance of granulovacuolar degeneration in, *85
Amaurotic family idiocy, histochemistry of the cerebral cortex, *284
American association of neuropathologists. annual meeting, Atlantic City, N.J., *299
Anderson, P. J., and S. K. Song, acid phosphatase in the nervous system. I. evaluation of the hexazonium pararosanilin method. II. the histochemical localization with hexazonium pararosanilin, *263
Anophthalmia, congenital, human, geniculate body in, *377
Aronson, S. M., see Kaplan, H. A., T304
Asao, H., see Roizin, L., T318
Asphyxiation of the spinal cord, nerve cell destruction, *410
Astrocytes, normal and reactive, cytochemistry of, *471
Ataxic form of polyradiculoneuritis (Landry Guillain-Barré syndrome), clinical and pathological observations, *171
Axons, terminal, histological changes, of muscles after local cold injury, *348

Baggio G., see Gomirato, G., *634
Bakay, L., cerebral uptake of tritiated tetracycline from blood and cerebrospinal fluid under normal conditions and in experimental meningitis, *424
Barbeau A., see Schulman, S., T315
Barnes, J., and L. Liss, peripheral neuromas in cats, T328
Barron, K. D., enzymatic hydrolysis of adenosine-5-phosphate in nervous tissues, T324
Basal ganglia, symmetrical calcification, *364
Bauer, W. C., see Zacks, S. I., *335
Benda, C. E., D302, D305
Bentz, R., see Scott, M., *194
Berry, R. G., and B. J. Alpers, perivenous encephalitis complicated by acute hemorrhagic leukoencephalitis, T325
Bertrand G., see Jane, J. A., *400
Blinzinger, K., see Nelson, E., *155, T317
Blumberg, J. M., see Zacks, S. I., *335, *610
Book reviews, B170, B332, B488, B658
Borner, G., see Innes, J. R. M., *519
—, see Zeman, W., T326
Bornstein, M. B., patterns of disorganization of central myelin in vitro, T311
—, see Ross, L. L., T312
—, see Yonezawa, T., T310, *479
—, see Murray, M. R., T309
Botulinus toxin, ferritin-labelled, localization in the neuromuscular junction of the mouse, *610
Bovine central nervous tissue fractions, encephalogenetic properties of, *461
Bowden, D. H., and P. G. Danis, oculocutaneous cerebellar telangiectasis, T303
Boyd, D., see Clasen, R. A., *579
Brady W. J., brain stem gliomas causing hydrocephalus in twins with von Recklinghausen's disease, *555
Brain injury, local, oxidative enzyme activity of glial cells in a, *116
Brain stem gliomas causing hydrocephalus in twins with von Recklinghausen's disease, *555
Brain, symmetrical calcification, with predominance in the basal ganglia and cerebellum, *364
Bunge, R. P., E. R. Peterson, and M. R. Murray, modification of nervous tissue development by physical and nutritional factors, T310
Burnstein, T., see Waksman, B. H., *25

Calcification, symmetrical, of the brain with predominance in the basal ganglia and cerebellum, *364
Cancer arising in a dermoid of the brain, *383
Carnecki, G., see Clasen, R. A., T327
Cerebellum, symmetrical calcification, in, *364
Cerebral lesions, experimentally produced in cats by injections of alcohol and etopalin paste, *294
Chick brain, experimental production of sarcoma, in, *388
Children, sarcoma of brain, experimental production, in, *388
Choroid plexus, ultrastructure of, in hydrocephalic offspring from vitamin A deficient rabbits, *250
Circulation and metabolism following experimental cerebral embolism, *4
Clasen, R. A., P. M. Cooke, and G. Carnecki, intravenous hypertonic urea in experimental cerebral injury, T327
Clasen, R. A., P. M. Cooke, S. Pandolfi, D. Boyd, and A. J. Raimondi, experimental cerebral edema produced by focal freezing. I. An anatomic study utilizing vital dye techniques, *579
Clinicopathologic significance of granulovacuolar degeneration in Alzheimer's disease, *85
Cohen, M., D321
Cold injury, comparative histologic changes of myoneural junctions, after local, *348
Comparison of cerebral lesions experimentally produced in cats by injections of alcohol and etopalin paste, *294
Condie, R. M., see Olson, R. E., *461
Cooke, P. M., see Clasen, R. A., T327, *579
Cowen, D., D326
Cutaneous nerve, electron microscope study of degenerative changes in human, *105
Cyst, posterior fossa, intracranial cerebellar meningo-encephalocele, *50
Cytochemistry of normal and reactive astrocytes, *471
Cytological method for the diagnosis of tumors affecting the central nervous system, *400

D'Agostino, A. N., and J. W. Kernohan, tuberous sclerosis complex: report of case in an eighteen month-old child, *79
Danis, P. G., see Bowden, D. H., T303
Degenerative changes in human cutaneous nerve, electron microscope study, of, *105
Dehydrogenase, succinic, activity in glial tumors, *137
Dekaban, A., and W. Windle, hemorrhagic lesions in acute birth injuries, T305
Dermoid of the brain, a cancer arising in, *383
Diagnosis of tumors affecting the central nervous system, cytological method for, *400

Earle, K. M., D306
Edema, experimental cerebral, thiocyanate space of rat brain in experimental, *437
—, experimental cerebral, produced by focal freezing, *579
Editorial, *1
Effect of sciatic nerve section on histochemical reactions of sensory end organs, *655
Electron microscope study of degenerative changes in human cutaneous nerve, *105
Embolism, cerebral, circulation and metabolism, following, *4
Embryo rat brain, x-irradiated, neuropathologic investigations of, *219
Encapsulated glioma of the Sylvian fissure associated with neurofibromatosis, *566
Encephalogenic properties of bovine central nervous tissue fractions, *461
Encephalomyelitis produced in hamsters by a neurotropic strain of measles, *25
Encephalitis, toxocara canis, human, *201
Encephalitozoönosis of the central nervous system of mice, occult, endemic, *519
Enzyme activity, oxidative of glial cells in a local brain injury, histochemical observations on, *116
Enzymes, oxidative, study of, in myelinating cultures, *479
Epileptogenic focus, heterotopic cerebral gray matter, as an, *244
Etopalin paste, injection into cat brain, experimental lesions, *294
Evans, J. W., see Vogel, F. S., T314
Experimental allergic encephalomyelitis, comparison with certain experimental and naturally-occuring, viral leucoencephalitides, *491
— cerebral edema produced by focal freezing. I. An anatomic study utilizing vital dye techniques, *579
— meningitis, uptake of tritiated tetracycline in, *424

Feigin, I., and Nina Popoff, pathological observations on cerebral edema, T299
Ferritin-labelled botulinus toxin, localization in the neuromuscular junction of the mouse, *610
Finean, J. B., and A. L. Woolf, an electron microscope study of degenerative changes in human cutaneous nerve, *105
Freezing, focal, experimental cerebral edema, produced by, *579
Frenkel, J. K.,
—, see Innes, J. R. M., *519
—, see Zeman, W., T326
Friede, R. L., cytochemistry of normal and reactive astrocytes, *471, D312, D318
—, histochemical studies in multiple sclerosis, T323
—, a quantitative study of myelination in hydrocephalus (factors controlling glial proliferation), *645

Ganglioglioma: a case with long history and malignant evolution, *185

Geniculate body, human in normal development and congenital unilateral anophthalmia, *377
Ghaemi, K., and W. B. Hamby, comparison of cerebral lesions experimentally produced in cats by injections of alcohol and etopalin paste, *294
Gillilan, L. A., the arterial blood supply of the human brain stem correlated with vascular lesions, T303
Glial cells, histochemical observations on oxidative enzyme activity of, in a local brain injury, *116
Glial proliferation, factors controlling, in hydrocephalus, *645
Glioma of the Sylvian fissure, encapsulated, associated with neurofibromatosis, *566
Gliomas, brain stem, causing hydrocephalus, *555
—, unusual response of inferior olive, to, *70
Gluszcz, A., a cancer arising in a dermoid of the brain. a case report, *383
Gomirato, G., and G. Baggio, metabolic relations between the neurons of the optic pathway in various functional conditions, *634
Good, R. A., see Olson, R. E., *461
Gotoh, F., see Meyer, J. S., *4
Granulovacuolar degeneration in Alzheimer's disease, clinicopathologic significance, *85

Hager, H., see Nelson, E., *155, T317
Hamby, W. B., see Ghaemi, K., *294
Harvey, F. H., E. C. Alvord, Jr., C. M. Shaw, and D. A. Rappaport, the dual role of the cerebellum in the development of the active neurological syndrome following x-irradiation of guinea pigs, T329
Hauser, H. M., and J. W. Kernohan, unusual response of the inferior olive to gliomas, *70, T322
Haymaker, W., see Klatzo, I., T328
Hermida, H., see Roizin, L., T318
Hirano, A., N. Malamud, and L. T. Kurland, parkinsonism-dementia complex, an endemic disease on the island of Guam, pathological features, T315
Heterotopic cerebral gray matter as an epileptogenic focus, *244
Hexazonium pararosanilin method, evaluation and histochemical localization of acid phosphatase in the nervous system, *263
Histochemical observations on oxidative enzyme activity of glial cells in a local brain injury, *116
— study of oxidative enzymes in myelinating cultures of central and peripheral nervous tissue, *479
Histochemistry of the cerebral cortex from a case of amaurotic family idiocy, *284
Histological study of the encephalomyelitis produced in hamsters by a neurotropic strain of measles, *25
Hoag, W. G., see Meier, H., *649
Hortega's silver impregnation method, modification of, *147
Human toxocara canis encephalitis with lead encephalopathy, *201
Hunt, G. M., see Witzel, E. W., *250
Hydrocephalic offspring from vitamin A deficient rabbits, *250
Hydrocephalus, caused by brain stem gliomas, *555
—, myelination in, *645
—, produced by compression of an intracranial cerebellar meningoencephalocele at the incisura tentorii, *50
Hypertrophy of the inferior olives in the cat, *92
Hypothalamus lesions, posterior and anterior, effect on the maintenance of body temperature, *450

Inclusion body formation, concentric hyaline, in mental disease, *442
Incorporation of thymidine-H^3 by cells in normal and injured mouse spinal cord, *597
Infants, symmetrical thalamic degeneration in, *372
Infectious leucoencephalitis, *491
Innes, J. R. M., W. Zeman, J. K. Frenkel, and G. Borner, occult endemic encephalitozoönosis of the central nervous system of mice (Swiss-Bogg-O'Grady strain), *519
—, see Zeman, W., D308, T326
Intracranial cerebellar meningo-encephalocele (posterior fossa cyst) causing hydrocephalus by compression at the incisura tentorii, *50
Intramedullary neurilemmoma (neurinoma) of the thoracic cord. a case report, *194
Issidorides, M., see Shanklin, W. M., *284

Jane, J. A., and G. Bertrand, cytological method for the diagnosis of tumors affecting the central nervous system, *400
Jervis, G. A., D317
Jones, E., see Scharenberg, K., T324

Kalamboukis, Z., and P. Molling, symmetrical calcification of the brain with predominance in the basal ganglia and cerebellum, *364
Kaplan, H. A., and S. M. Aronson, arterial and venous relationship in the normal human dura mater, T304
Kaufman, M. A., see Roizin, L., *219
Kemper, L., see Vogel, F. S., *147, T314
Kernohan, J. W., see Hauser, H. M., *70
—, see D'Agostino, A. N., *79, T322
Klatzo, I., J. Miquel, W. Haymaker, and C. Tobias, the effects of alpha particle radiation on the rat brain, T328
—, I., see Rubinstein, L. J., *116, D330
Klay, M., see Olson, R. E., *461

Koenig, H., nucleic acid histochemistry of normal and abnormal glia, T319
Koestner, A., a method utilizing morphine as an indicator of an alteration in the blood-brain barrier, T327, D330
Kurland, L. T., see Hirano, A., T315

Landry-Guillain-Barré syndrome, *171
Layton, D. D., heterotopic cerebral gray matter as an epileptogenic focus, *244
Lead encephalopathy in human toxocara canis encephalitis, *201
Lehrer, G. M., the quantitative histochemistry of human glial tumors, T320, D313, D322
Leucoencephalitis, infectious, *491
Leukodystrophy, metachromatic, Schwann cell alterations in, *534
Levine, S., D317
Lindenberg, R., D301, D304, D307
Liss, L., see Barnes, J., T328, D312, D319, D329
Localization of ferritin-labelled botulinus toxin in the neuromuscular junction of the mouse, *610
